

Meade Septic Design: New Construction Checklist

Stuart Meade | Email: stuart@septicdesign.com | Cell: 574-215-9289

Kevin Hinkle | Email: kevin@septicdesign.com | Cell: 574-349-5891

1. Client & Project Information

Job Name: _____

Client Name: _____

Phone: _____ Email: _____

Existing Site Address or Site Location from Neighboring Address (Include what side of Road & Nearest intersection):

IMPORTANT: Client must notify Meade Septic Design of any regulated drains, pipelines, or major utilities. All utilities (including private lines) MUST be marked before work begins. Call 811.

2. Required Documentation (Please Check All Included)

- Soil Boring Report (All pages from Soil Scientist)
- Health Department Requirements (Residential) or ISDH Tech Data Sheet (Commercial)
- Floor Plans with Dimensions
- Rough Site Plan (Showing house setbacks, driveway, and well locations)
- Property Details (Survey, Plat, or detailed legal description)

3. Building & Site Specifications

Total Bedrooms: _____ Installer Name (if known): _____

Basement: Yes No | Finished? Yes No | Plumbing in Basement? Yes No

Walkout? Yes No | If yes, should tanks sit in walkout with plumbing under slab? Yes No

Water Supply: Existing Well Proposed Well

House Staked On-Site? Yes No | *Please include desired house sewer location on sketch.

4. Field Work & Site Preparation

Vegetation: Site must be mowed or bush-hogged prior to field work. Design is impossible in tall grass, weeds, brush, or agricultural crops.

Drainage Tiles: If the system must outlet to an existing tile, that tile needs to be exposed for site work.

Perimeter drain outlet tile is currently exposed (dug up) or is accessible through tee, riser, Hickenbottom, etc. Explain:

**Note: Homeowner must vouch that existing tile is in good, functioning condition.*

5. Future Plans & Additional Info

Proposed Future Additions: Pool Detached Garage Pole Building

Additional Notes:
